WORK EXPERIENCE

IT Intern

JULY 2014 - AUGUST 2015

RMF Engineering Inc.

- Assembled, troubleshooted, installed, and deployed computer hardware including hard drives, CPUs, and graphics cards along with software including OS applications, drivers, updates, and data files
- Utilized communication skills by sharing programming ideas and unique concepts with the IT team to further advance company direction
- Actively interacted with clients on a daily basis to quickly and efficiently perform troubleshooting procedures
- Provided top notch customer service and met strenuous deadlines
- Ultimately gained valuable experience in the professional work environment including responsibilities, organization, time-efficiency, and maintaining healthy relationships with coworkers and mentors

PROJECTS

ScheduleMe

Bitcamp 2016 - University of Maryland, College Park

- Explored Android development for the first time and contributed to the front-end development of a schedule-making app that allowed the collaboration of different student schedules
- Learned the uses of API's and explored further functionality of Java outside of classroom projects and assignments
- Gained new knowledge in the importance of front-end development and user interface development
- Dabbled with back-end development in MySQL to learn how to integrate our app

Star Wars Oculus Rift Simulator

Bitcamp 2015 - University of Maryland, College Park

- Worked in a team of three that utilized the integration of a virtual reality headset, Oculus Rift, a Nintendo Wii Remote, and the Unity5 game engine to create a virtual reality Star Wars simulator game in 36 hours
- Expanded knowledge on C and JavaScript programming to ensure language functionality with Unity game engine
- Utilized the use of blueprints and learned basic animation functions useful to project goal
